Mike—

Please see the e mail below. I assume we have a release request. Unless there's some problem I don't know about, I don't have an issue with them leaving 30 yards of material.

Subject: Quarry Closure at Westinghouse Western Zirconium Facility
To: "paulbaker@utah.gov" <paulbaker@utah.gov>

Dear Mr. Baker,

Over the last 18 months (approximate), W.W. Clyde has operated a quarry on the Westinghouse, Western Zirconium property located at 10,000 West 900 South, Ogden, Utah. The material from this quarry was used for an environmental reclamation project on the same property that was required by the Department of Environmental Quality. This project has been completed, and W.W. Clyde is in the process of closing the quarry. Approximately 30 yards of crushed and sized material has been left over from this project. We would like W.W. Clyde to stack this material and leave it where the material from the quarry was previously staged. We realize that this material will now become the responsibility of Westinghouse, Western Zirconium, and that we will need to manage it to meet the requirements of the State of Utah Storm Water Permit that has been issued to our facility.

Please let me know if this request is sufficient to obtain the requested action. If a more formal request is needed on our company letterhead, I will be happy to provide that.

Sincerely,

Robert Cunliffe

Sr. Environmental Engineer

Westinghouse Electric Company

Western Zirconium
